

CHILDREN WITH AUTISM (6-10 YRS) NEEDED FOR MOBILE NUTRITION APP STUDY

WHAT ARE THE GOALS?

This is a research study to test two treatments for healthy eating in children with Autism Spectrum Disorder (ASD). One treatment involves a mobile nutrition application and one treatment involves traditional nutrition education.

WHAT WILL PARTICIPANTS BE ASKED TO DO?

- Promote healthy eating over 3 months
- Complete 2 short home visits
- Complete brief phone-based dietary interviews.
- Participants will be compensated for their time
